

Technical specifications:

V-Light&Easy	V-105
Max. load	105kg
Weight*	1.26kg
Area flat	29.5m ²
	6.2m/s@105kg
Sink rate	5.4m/s@95kg
	5.0m/s@85kg
Panels	18
Middle lines	2
LTF test no.	LTF AIRT-RG-074.2013
V-Light&Easy	V-125
Max. load	125kg
Weight*	1.66kg
Area flat	41.6m ²
	5.8m/s@125kg
Sink rate	5.4m/s@115kg
	5.0m/s@110kg
Panels	18
Middle lines	2
LTF test no.	LTF AIRT-RG-108.2013

*incl. container

The AIR VUISA V-series Light & Easy reserves

The V-series Light & Easy are state-of-the-art paragliding rescue systems. They represent an ideal combination of fast opening time, low sink rate, durability and lightness.

Our V-series ultralight reserves have outstanding performance without any compromise on the field of safety and durability, using the highest grade materials manufactured in the E.U. and quality manufacturing and design.

We have achieved opening times of less than 3 seconds, using the latest technologies in the design process, comprehensive testing, use of special EU 29g/m² high quality material, manufactured in the EU for AIR VUISA, as well as the use of our exclusive rescue container.

Our container is based on the well tested CROSS – one point principle, with our innovation of a special sleeve for neat packing of the 1.3mm Liros New age Dynemma lines. This ensures a quick and safe reserve opening, without the danger of entanglements, but also very easy packing. We have also integrated a special sleeve in order to protect the short part of the lines that are outside the reserve container.

- Fast opening time (<3sec)

- Low sink rate

- High quality state-of-the-art durable materials (29g/ m² fabric, 1.3mm Liros New age Dynemma lines)

- Lightweight design - 1260g (V-105)

- Easy packing

- LTF Certified
